

30 MOST IMPORTANT THINGS TO TAKE CARE OF IN THE LAST 30 DAYS

1. **Don't take more than 3 odd Mocks a week.** No additional learning after this. Bootcamp being an exception here 😊
2. **Mock Analysis:** Day 0: Voice Note. Day 0-2: Solving all questions which weren't right. Day 4-5: Update your MAC.
3. Your next 10 marks are lying with those topics/questions/concepts you've been avoiding since the last few weeks/months. **Read this again!**
4. Remember that good old Pomodoro Technique! The one you used but probably couldn't continue it for long! **Try that again!** It'll work like a charm. 40-45 minutes of uninterrupted studies followed by a 5-minute break, in multiple cycles! You'd have studied for 8-10 hours a day without even feeling like it!
5. Ideal eventual attempts: **Between 95-110 attempts.** Anything less and say goodbye to at least the top 10 National Law Schools.
6. Keep experimenting till October end. In the last one month, try perfecting your strategy around attempts, sequence etc.
7. There's no better motivation than a motivating talk with your Parents. **Try it!**
8. The ideal sequence seems a lot more important but is a lot less important. Right time management seems a lot less important but is a lot more important.
9. For the rest of your life, the only thing that'll remain with you from the next two months will be your CLAT result. **Don't forget!**
10. It's fine to waste even half a day, if you're not doing it more than 1-2 times a week. *Isse zyada nahi!*
11. Try and clear CLAT/AILET not because only National Law Schools provide great law education. Do it because you've set a goal for yourself, and you wish to give it all. You already knew it deep inside, right?
12. Feeling the pressure? **Just Smile!** When you smile, your brain releases neuropeptides, which help fight stress.
13. **Filling OMRs is the end has the highest risk.** Filling after each question takes the most amount of time. Recommended: After each passage (Generally 4-5 questions).
14. Don't look for a comfortable score (80-90 etc). That's unrealistic. **Aim to improve your rank by 10% with each Mock.**

15. Rule for Flukes: Can eliminate one option? You can mark an answer. Can we eliminate two options? **Definitely go for it.**
16. **Don't deviate from the recommended preference list.**
17. Lack of concentration during the Mock? **20:20 rule and water should help.**
18. **Ego screws up more exams than lack of preparation does.**
19. "Let me tell you something you already know. The world ain't all sunshine and rainbows...That's how winning is done!"
20. Attempting 5 sections imperfectly is better than attempting 4 sections "perfectly".
21. Recommended Sectional Time: EL and Logic: 50-55 seconds/question. Legal Reasoning and QT: About 70-75 seconds per question. GK: 10-14 minutes, depending on the type of questions.
22. The first 30 seconds of each Mock should be spent going through the complete paper. No surprises during the paper.
23. **English Language:** Do learn the tricks to get the answers right in questions around Main Idea, Theme, Title, basic grammar questions etc.
24. **Legal Reasoning:** While analysing your Mocks, pay special attention to legal terms/maxims/phrases given in the passages.
25. **Legal Reasoning:** Scores not increasing? Act like the paper setter and write an explanation for the correct answer as well as your answer (which turned out to be the incorrect answer!) in your own words.
26. **Legal Reasoning:** Quality over Quantity. Instead of aiming to solve hundreds of new questions, go through dozens of old questions and apply the knowledge to new questions.
27. **Logical Reasoning:** Summarize the passage in your own words before moving on to the questions. It'll help you get your answers right a lot more often.
28. **Logical Reasoning:** Go through the papers of CLAT 2020-23. You'll have a much better idea of what to expect. Do this for QT and Legal Reasoning also.
29. **Keep your distractions at bay.**
30. Easy CLAT paper or difficult CLAT paper? **Improvisation is the key.**

ALL THE BEST!
