

NID 2026 Exam Detailed Analysis

Q1.A story given about a guru and an idiot man , asked to draw 3 illustration on the key points (15 Marks)

A Guruji is travelling in a palki along a pathway, accompanied by his group of disciples and followers. As the procession moves forward, an idiot man suddenly stands in the middle of the path and stops the palki. He insists that the Guruji must come down and meet him; only then will he allow the group to proceed. The followers consider the man foolish and try to ignore him.

Observing this, the Guruji calmly steps out of the palki and approaches the man. The man respectfully asks, “Guruji, can you please show me the way to heaven?”

The Guruji replies simply, “The path to heaven is very easy. Raise your hand towards the sky and stand here at this very place.”

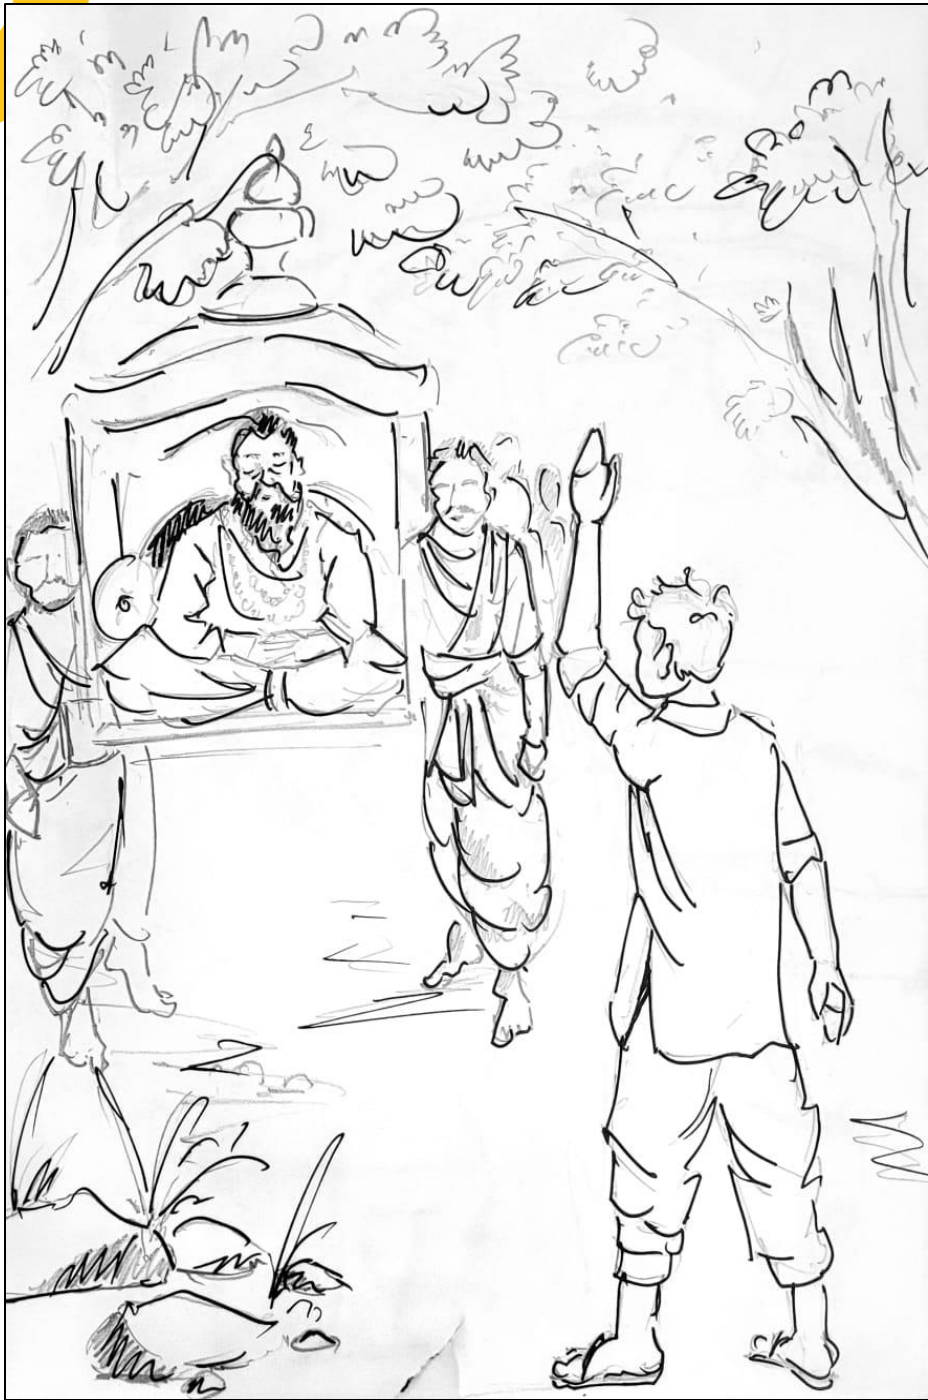

The Guruji and his followers then continue their journey, leaving the man standing there with his hand raised.

After twelve years, the Guruji passes through the same place again. He notices the same man still standing in the exact position. However, the man’s appearance has changed—his beard has grown long and dense, his clothes are torn, dusty, and grey, showing the passage of time.

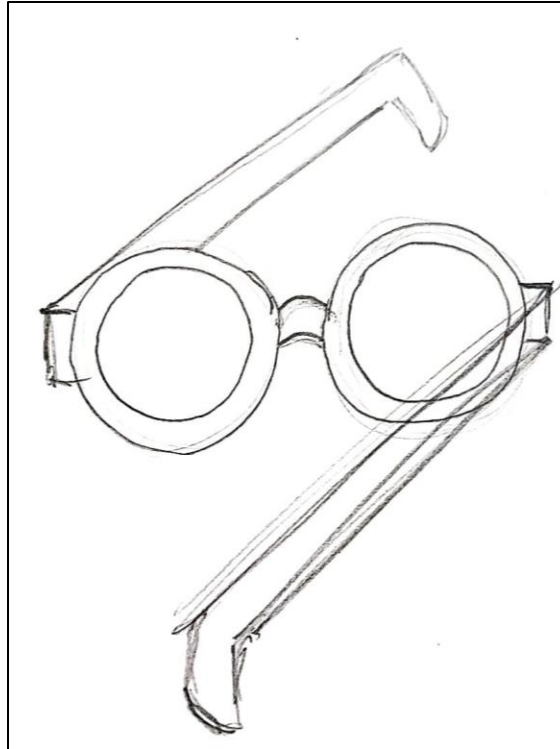

The Guruji steps closer and realizes that the man’s soul is now leaving his body and rising towards the sky.

Understanding that the man has attained heaven through devotion and patience, the Guruji immediately holds onto the man’s feet. As the soul ascends, both the Guruji and the man are lifted together, moving towards heaven.

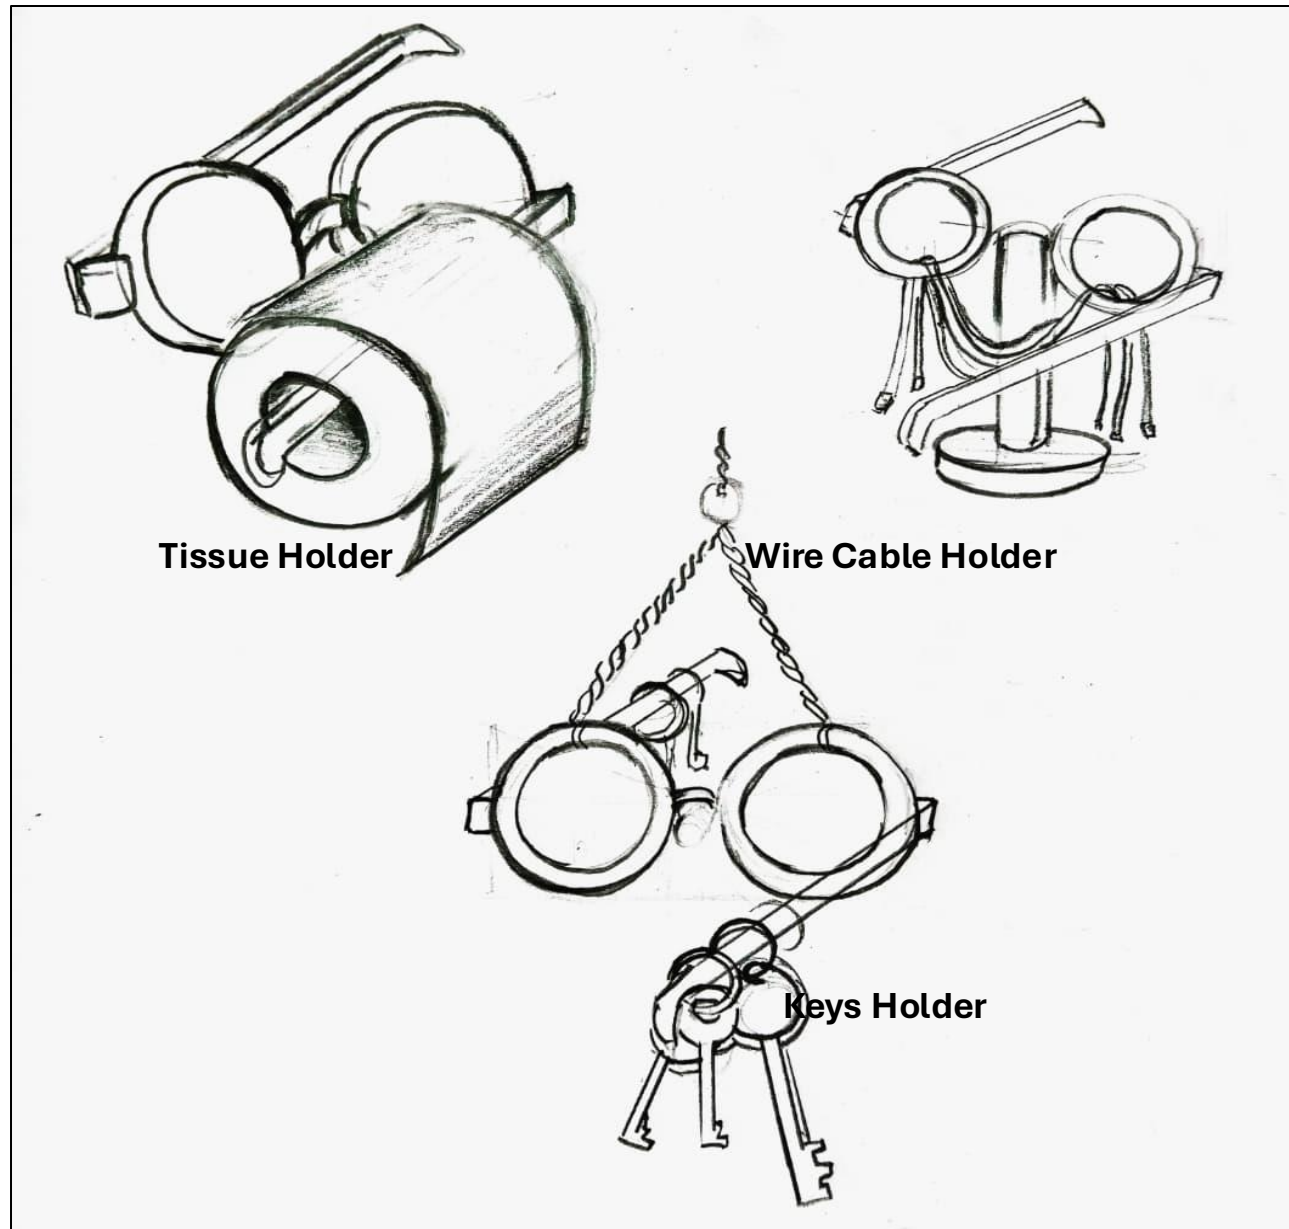

Q2. Using the given product made of rigid plastic with an approximate size of 1 ft' , illustrate three different functional uses of the same product. (15 Marks)

Solution:

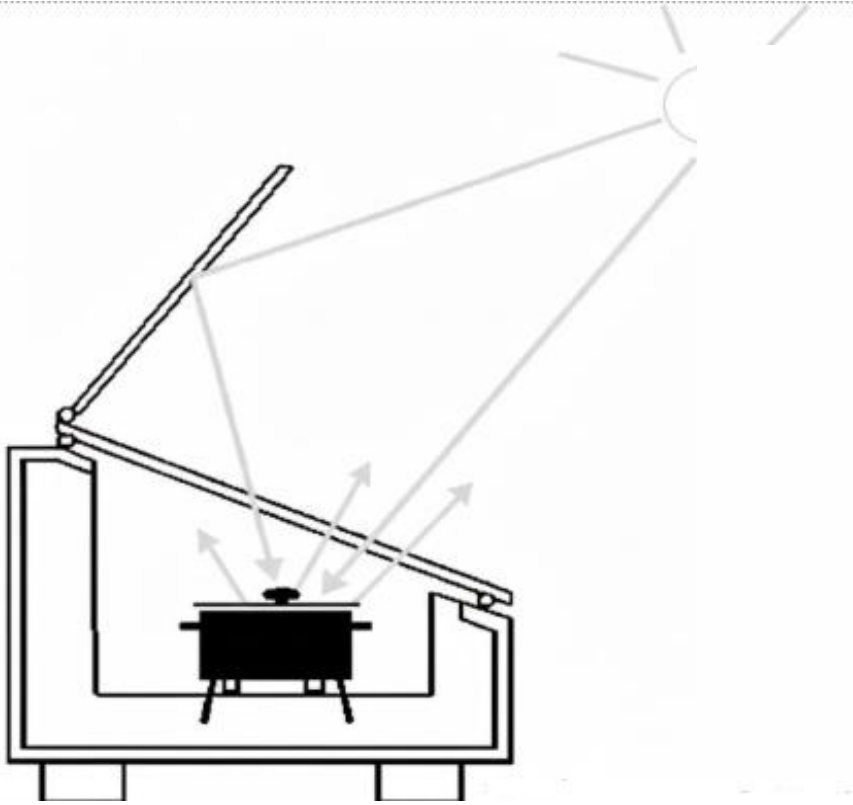

Q3. Solar energy helps in preventing air pollution and the release of harmful gases. However, solar panels are made using lithium, which is a rare and limited mineral resource.

- a) Write your opinion on this issue. (5 marks)**
- b) Draw three visual posts for social media to create awareness about the benefits and challenges of solar power. (15 marks)**

Solution: Part a) Electricity produced through thermal power causes a lot of air pollution due to gases and carbon it emits and that with nuclear power consumes too much water. All in all, they leave a lot of carbon footprint. We can overcome both these problems by using Solar energy. However, that too does not come without the hazards of using rare earth material like Lithium.

Cook with Solar

Cooking with solar cooker save energy, enhance the taste, give high nutritional value

Eraze the carbon footprint

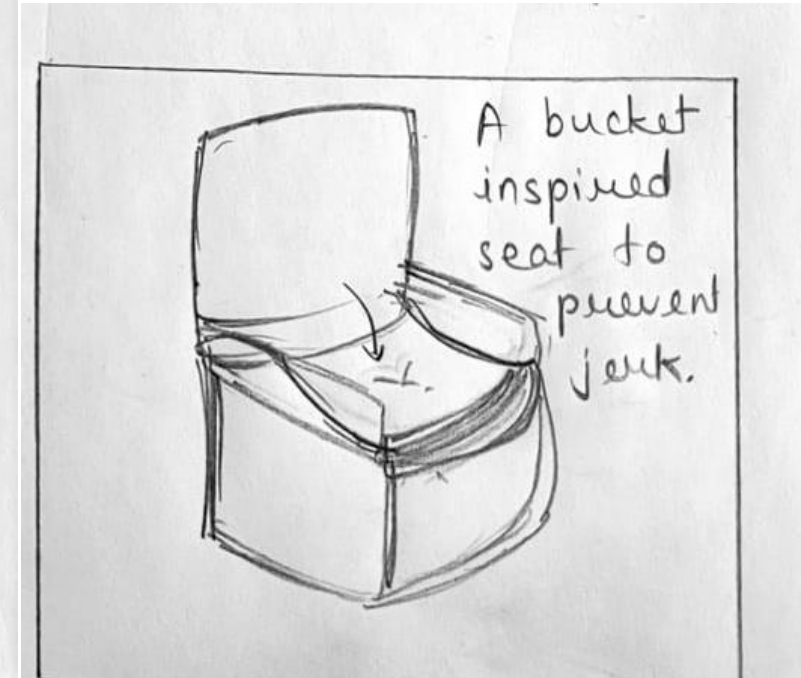

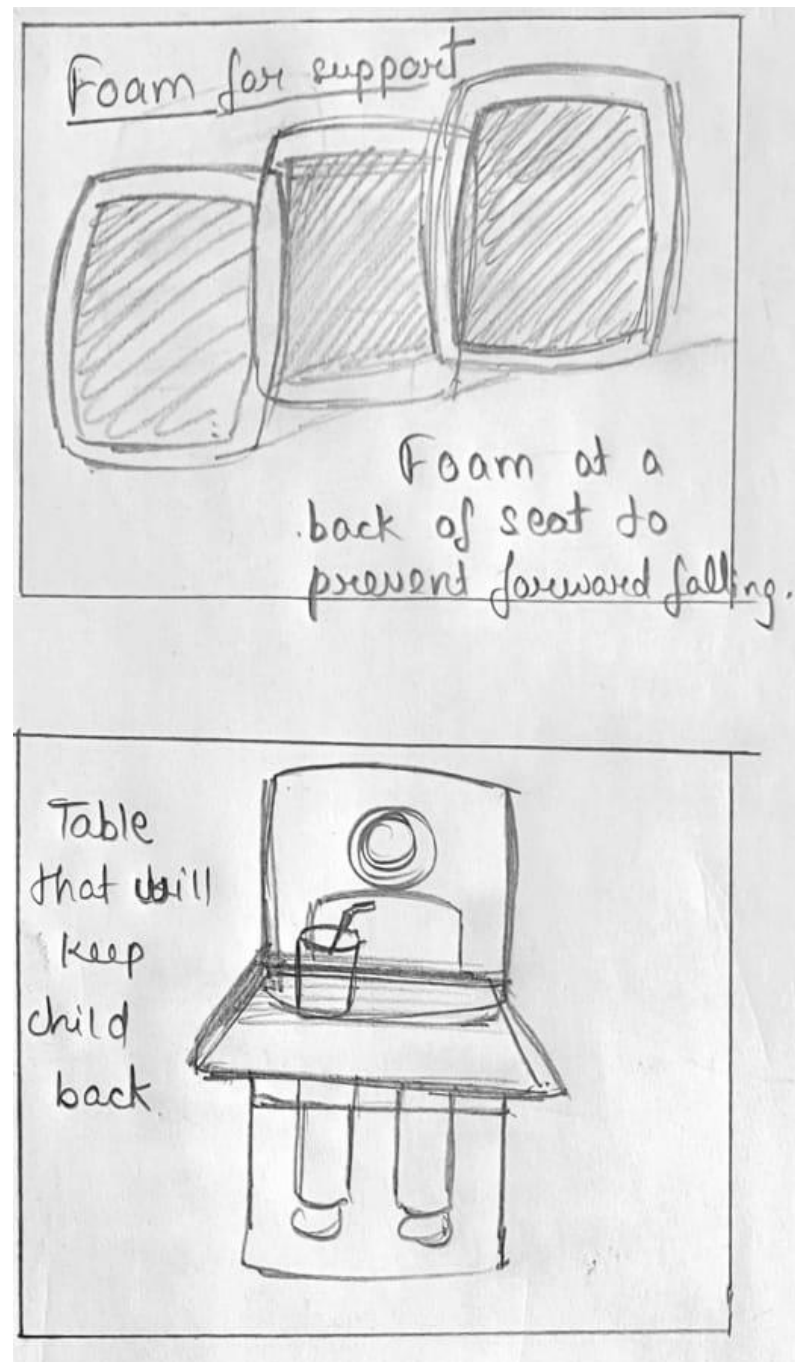

A clean environment promotes deep breathing and supports healthy living.

Discard thermal power

Thermal power plants cause air pollution, generate excess heat, and contribute to global warming and increased carbon footprint.

4. Design three solutions other than seat belts for bus seats that would prevent kids from injuries. (15 marks)

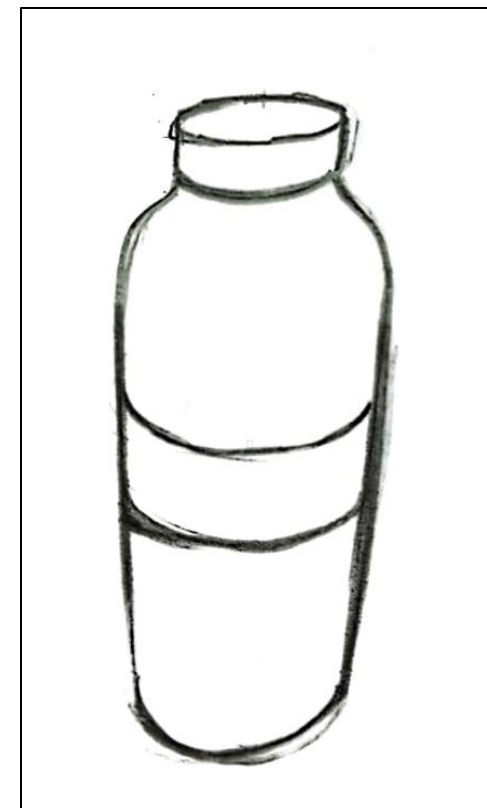

Q5. Redesign a water bottle for the following users:

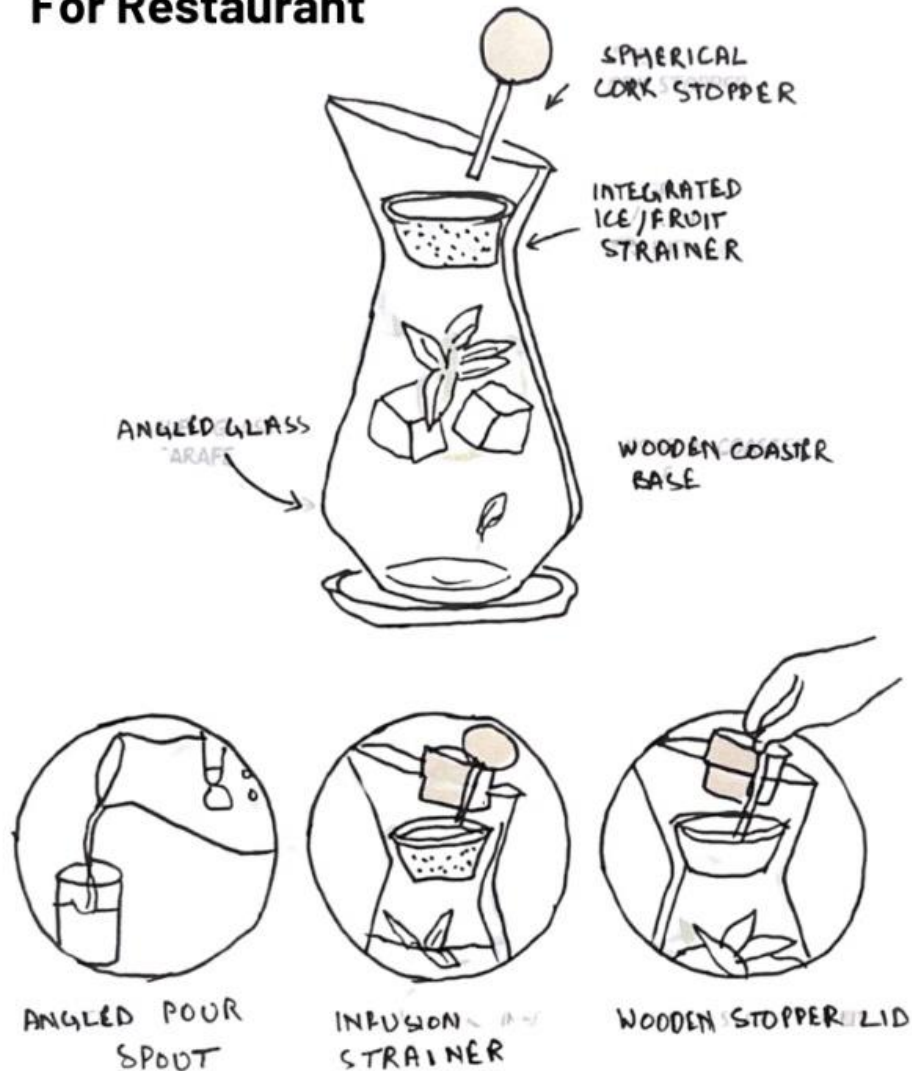

- **Hospital patient**
- **Restaurant use**
- **Family get-together**

Instructions:

- **Draw three separate product views.**
- **No background.**
- **Show user-specific functional features clearly.**
- **Use clean lines and minimal shading.**
- **Describe each design ideas**

For Restaurant

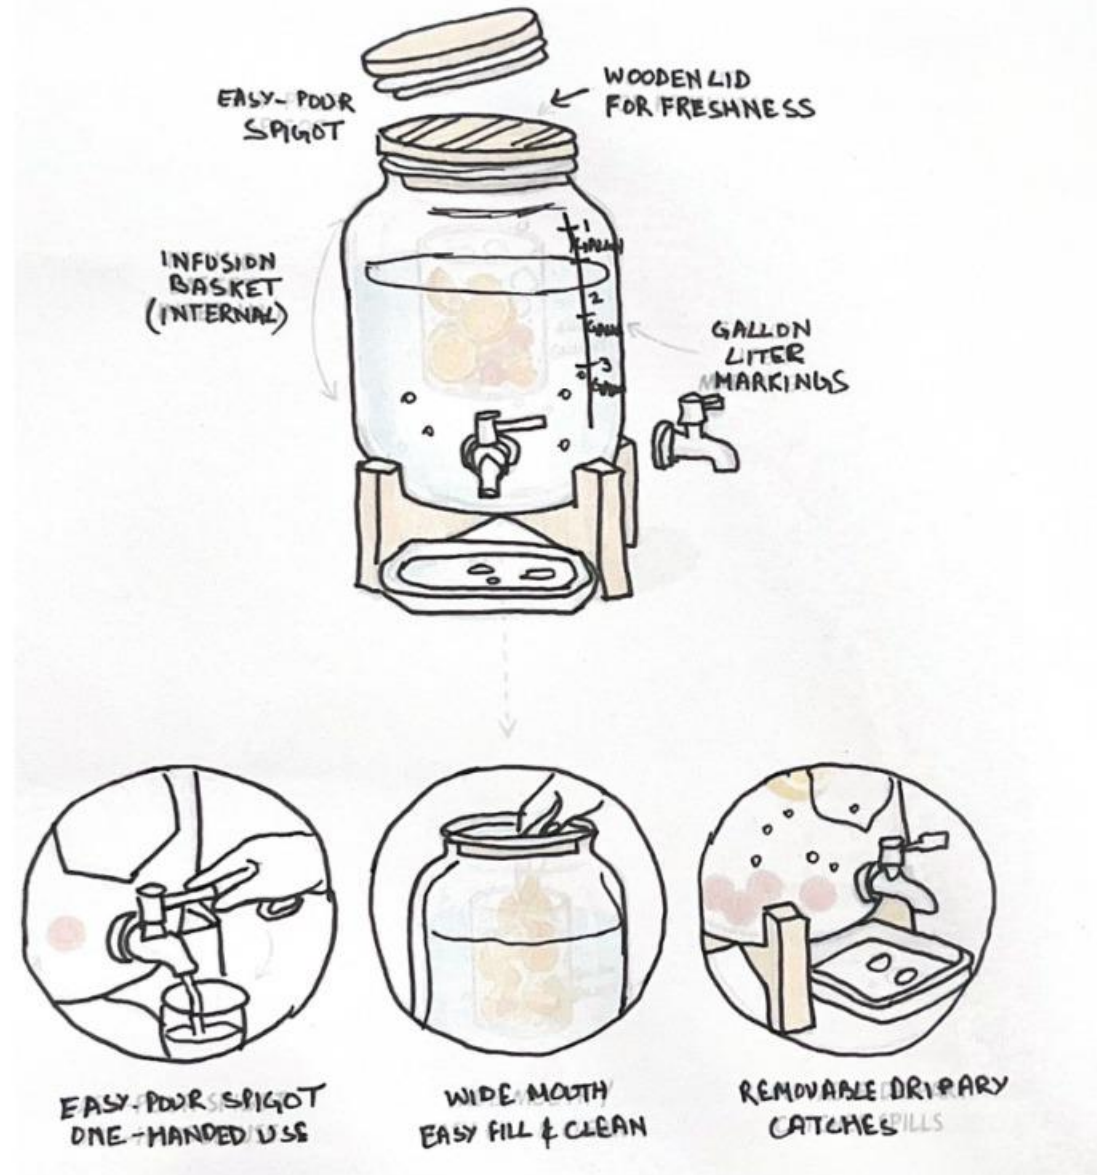

Precision Pouring: Designed with a sharp, angled glass spout to ensure a drip-free experience when serving at a table.

Infusion System: Contains an integrated mesh strainer that holds ice, mint, or fruit, preventing them from clogging the spout while pouring.

Table Protection: Accompanied by a wooden coaster base and a spherical cork stopper to maintain temperature and protect surfaces.

For Home Gathering/Living area

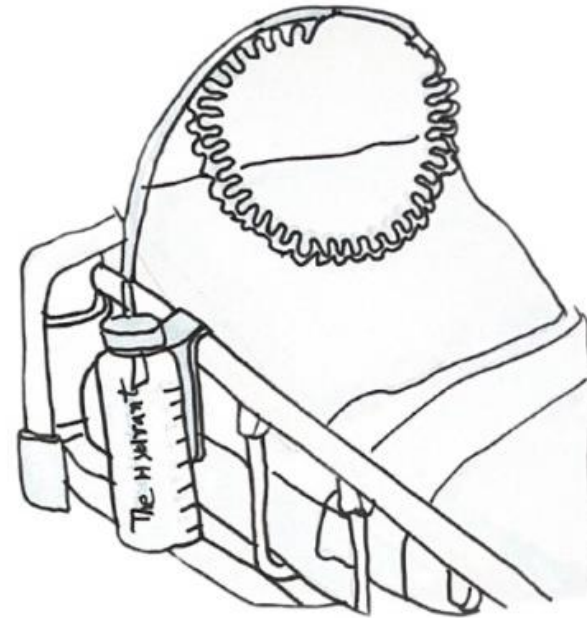

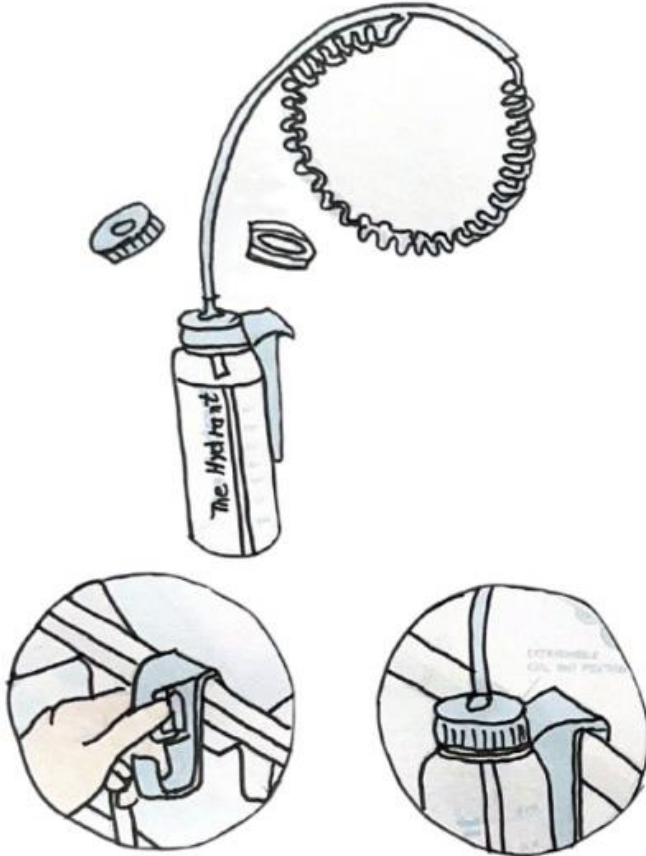

Communal Capacity: A large-volume glass basin designed for serving groups during family gatherings.

Easy Dispensing: Features a front-mounted metal tap for quick, mess-free pouring into glasses.

Stable Base: Elevated on a sturdy wooden stand to provide clearance for glasses and prevent tipping.

For Hospital

Secure Attachment: Features an integrated bedrail clamp that clips firmly onto the hospital bed frame for easy access.

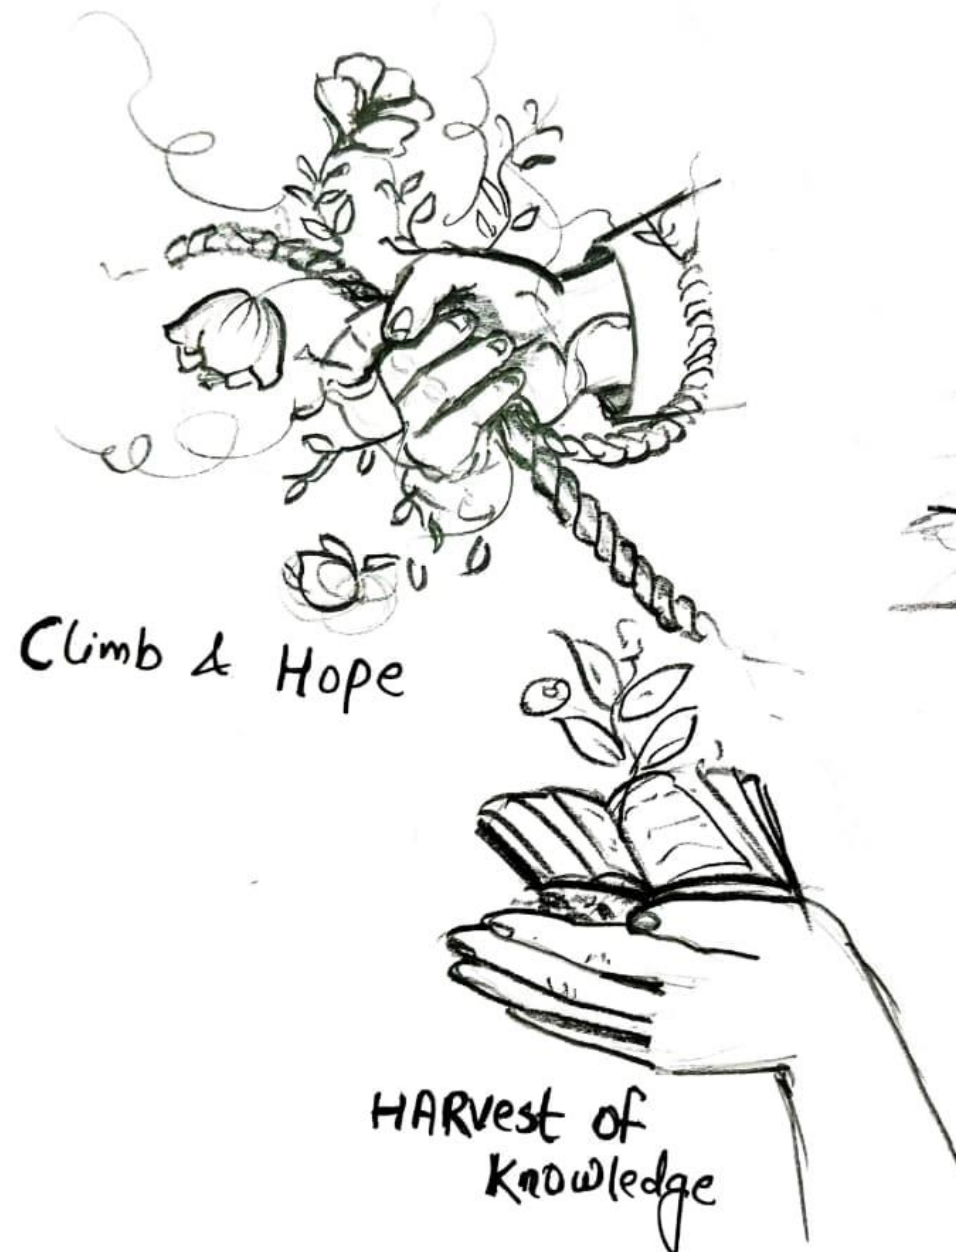

Extendable Reach: Includes an extendable, coiled plastic tube that allows the patient to drink from any position without needing to lift the bottle.

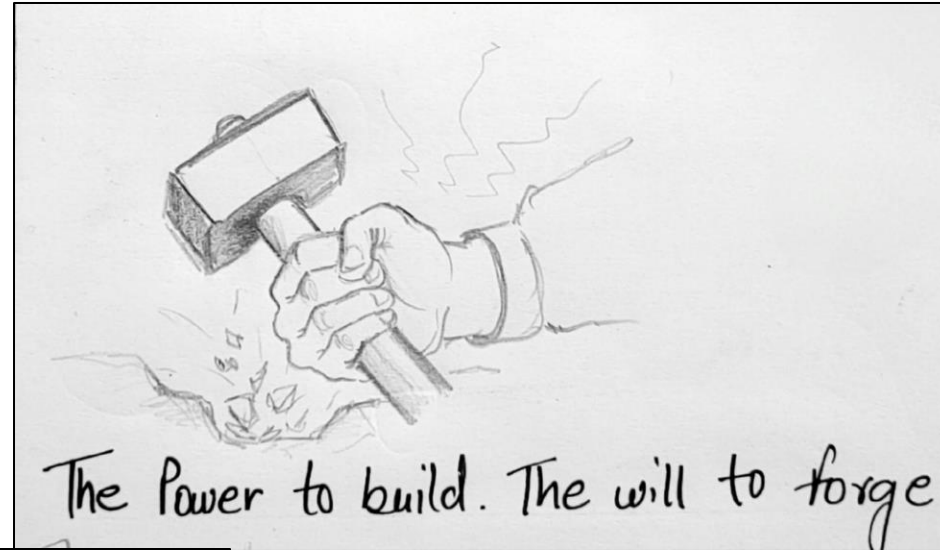

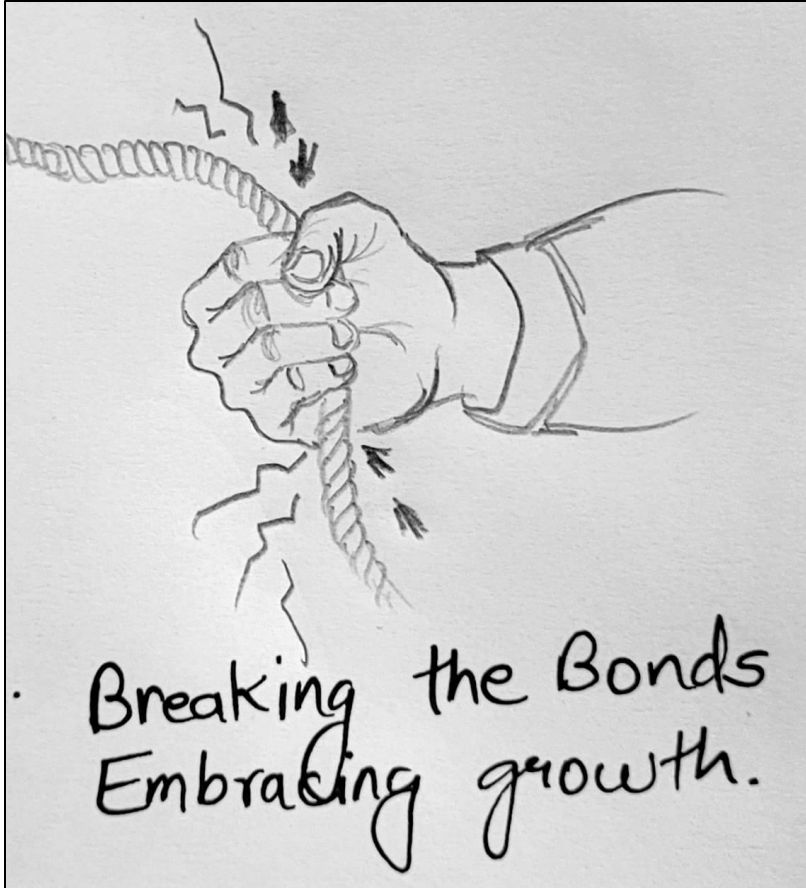

Monitoring: The bottle is transparent with clear measurement markings to help staff track precise fluid intake.

Q6. Draw a hand(until wrist) With respect to giving things which will create a meaningful image like (hand and wings shows freedom) Describe the image Do not use words more than 200 words - 20 marks

And mention the title or caption

- 1. hammer**
- 2. plant**
- 3. Rope**

21 **DAYS**
Zero Distractions.
Maximum Score Boost.
